Using an Hourly Consultant

Consultants who work by the hour are an excellent choice if you want to plan everything yourself but wouldn't mind a little objective feedback once in a while. For instance, when he wants beef and you want chicken, a consultant might lend some insight into the most popular entree selection, the pros and cons of offering multiple entree choices, and which selection will help you stay on budget. You might also want to hire a consultant on an hourly basis so you can use his or her list of vendor recommendations, such as florists, reception halls, musicians, and so on. Then you can do the actual calling, interviewing, and hiring.
